Entered at the postoffice in Tonopah as second class matter.

DISTANCE LENDS ENCHANTMENT.

The golden pot at the horns of the rainbow always holds an allure for the adventurous and the mining game is filled with just as many temptations as ever. Subsidized press reports are beginning to show the activity of publicity men lured to boost for their respective localities with the object of enlisting the notice of miners and those who believe there is better value for one's money away from home. In Manitoba they are training up for a rush to the new fields discovered last fall just before the eight months winter season of that inhospitable land sets in. Stories are filtering out about the phenomenal discoveries of gold in the swamps of La Paz close to the shores of the bleak Hudson Bay region where it requires a fortune to reach and another stake to get away. From the best indications it is gathered that La Paz is famous chiefly for its bottomless bogs and mammoth mosquitoes which make life miserable day and night for the invaders of their sacred domain. Whatever the eventual returns from that district may be, it is safe to venture the guess that they will be nothing comparable to the amount of money lost in prospecting the ground. This is no Klondike proposition where gold was to be had for the gathering and a timely warning should be sounded against venturing into this untracked zone of operations. Another report has the rumor that silver richer than known in mining annals has been found on the boundaries of British Columbia and the Yukon territory. Fabulous claims are reported as the result of first efforts made last year and the assurance is given that during the coming summer the discoveries will cover a vastly expanded area. Silver both reports are from regions calling for long distance travel. It does not seem above suspicion that transportation companies have hired the services of a staff of good Yukon publicity men who know how to play on the feelings of the miner and prospector who is always ready to take a chance. The prospects at home or in accessible locations under the American flag are equally numerous although not so well advertised and in this connection attention is called to the numerous discoveries of importance that have been made within a day's ride of Tonopah.

Nevada is secretly more than surrounded by the picks of prospectors and the dawning season will find the mountains and gulches invaded by an army of intrepid seekers after wealth who will not have to hazard the evenings of a lifetime in exploring a foreign country with the distant chance of making good. It should be borne in mind that the mere finding of gold or silver is not the principal consideration for the miner who must look at the map and figure out the cost of getting his ore to a smelter or mill before he can realize an investment. Nevada county has more opportunities today than any other part of the United States and one does not have to go away from home to hear of the investment of immense amounts of capital for the purpose of bringing into the productive state deposits which for years have gone begging. In one locality about which little is heard it may be mentioned that San Francisco and Kansas City capital is engaged in opening extensive enterprises calculated to keep hundreds of stamps going for an indefinite time. Around the forsaken and almost forgotten region of Iowa the British company of Kansas City is about to reap the harvest of a far seeing investment which was undertaken ten years ago when nobody would look at a silver offering. Between Kansas and Iowa there are other strong companies are operating without making any secret of their intentions. The Bruner company particularly expresses the wish that it was equipped with a mill of double the capacity of its recently finished plant to handle a greater tonnage of ore. Already an extension is planned and other companies are not making the mistake of going into the business on any parsimonious scale.

Unless all signs fail there will be a equally spectacular development in the Colorado Arrowhead and Tyro districts all included within the area of Nevada county. The sign does not show a day that does not usher in new companies all strongly financed for silver mining. Silver has become such a rarity in the east that a dollar is seldom seen east of the Rocky Mountain range and the wise men of New York are grasping the silver mine truth that silver has passed the stage of monetary use and ranks higher than gold as a precious metal.

A POLITICAL PUZZLE.

Not alone is Europe deeply concerned with the cancellation of President Wilson, but the leaders of the country are beginning to wonder what is the psychology of the European situation when the best minds of France, England and Italy disagree on interpreting the recent note of Mr. Wilson with reference to the final disposition of Fiume. By the secret treaty of London Great Britain and France are committed to the project of restoring Fiume to Italy to which it rightfully belongs. Mr. Wilson is the sole member of the treaty league who disputes the justice of this action as he still insists that the weaker nations have the right of self-determination and therefore is unwaveringly committed to turning the gateway of the Adriatic over to Czechoslovakia. Under the circumstances the proper thing for the president to do would be to refrain from meddling with the affairs of Europe since he has not succeeded in convincing his own congress of the right of this country to act as an element in deciding the future of any foreign dependency. The president cannot prescribe opposing medicines for the same complaint. Political juggling must cease at some time for the public cannot be fooled all the time and it comes down to a question of fish or cut bait. The American public is not grieving over the final disposition of the D'Annunzio republic and they are more than willing to cut loose from the whole blamed business. The conduct of the president is another apt illustration of what the French editors described in the Laiting case as an "anarchy in a democracy" with conclusions not flattering to the democracy that calmly accepts such prospects of an individual as the principle of a nation. Wilson has delivered an ultimatum which he says is not

an ultimatum and the world will have to endure some more of the schoolmaster's hairsplitting definitions before what he meant by his note to the allies is understood.

SPAIN IS NOT IN ANAESTHETICS TOUCH WITH ATHLETICS AS TREE HEALER

(By Associated Press)
 NEW YORK, Feb. 18.—While athletes in almost every form of sport will represent nearly every country on the globe during the Olympic games at Antwerp, Belgium, this year, a recent survey of the field of sports in Spain does not give promise of an extended entering of Spanish representatives in many of the events on the varied program. All efforts to wean the Spaniard from his national pastimes of bullfighting and pelota have met with scant favor so far. He may say that bullfighting is conducted mainly for foreigners on Spanish soil but just the same all the foreigners in that country were gathered together they would form only a very small proportion of the crowds which flock to Plaza de Toro in Madrid and other bull rings throughout the country on Sundays.

By getting together quite a large stable of thoroughbreds, King Alfonso has endeavored to interest his people in horse racing and with the support of some of his wealthier subjects has succeeded in organizing race meetings at Madrid, Barcelona, Santander and San Sebastian from spring until autumn.

Attempts to introduce tennis and football have not produced a national following as yet and as for boxing, some of the newspapers have criticized it severely as a brutal pastime. Polo is played to some extent but this is due to the proximity of the British garrison at Gibraltar and the encouragement given to it by King Alfonso and several nobles but it is not a game for the general public. Association football was introduced in Spain about 20 years ago and it is now popular amongst the younger generation. This invigorating pastime seems to be gaining favor every year and some look upon it as a possible rival of bull fighting in the future.

Philadelphia is desirous of holding the national rowing regatta next July. The University of Toronto will enter.

Elaborate plans are being prepared by the English Hurlingham Polo committee under the chairmanship of Earl Haig, for the defense of the American Polo cup which was won at Meadowbrook, N. Y. in 1914.

The University of Toronto will enter.

Different Colors of Paper

Many business men have a system of using different colors of paper for different printed forms, thus distinguishing each form by its color.

We can work this system out for you, using

HAMMERMILL BOND

the Utility Business Paper, and you will find that it saves you time and money.

DECORATING GRAVES OF FORMER SOLDIERS

(Correspondence of Associated Press)
 LONDON, Feb. 2.—Whether relatives shall be permitted to set up any sort of individual memorials they desire on the graves of soldier relatives in France, or the present policy be continued of permitting only the rude wooden crosses with name and identification number attached is the subject of a controversy which has arisen in England.

The best advice givers are the poorest advice takers.

For rowing crews in national and international aquatic contests this year for the first time since 1898. The University of Toronto Rowing club was formed at a recent meeting of graduates and undergraduates.

Early indications point to the greatest entry list for the 1920 University of Pennsylvania relay carnival ever received in the history of these track games. Although the meet will not be held until April 30 and May 1, eastern and western colleges are forwarding their entries in larger volume than ever before. Western entries to date include Michigan, Michigan Agricultural college, Minnesota, Nebraska, Kansas, Northwestern, Coe and the University of Southern California. The eastern colleges include Yale, Princeton, Columbia, Penn State, Syracuse, Pittsburgh, and more than twenty other institutions.
